PROFESSIONAL SUMMARY

Navy Cryptologic Technician Interpretive veteran with six years of intelligence experience, specializing in LATAM counternarcotics and Spanish-language analysis. Achieved Spanish DLPT 2+/2+ and produced 70+ intelligence reports. B.S. in Computer Science, Security+ and PenTest+ certified, with hands-on cyber investigation training.

CORE SKILLS

Intelligence: SIGINT, OSINT, multi-source analysis, LATAM research, counternarcotics intelligence, source evaluation, intelligence reporting, analytical quality assurance

Technical: Linux, Windows Server, Active Directory, Wireshark, Wazuh, Nmap, Nikto, Burp Suite; log analysis, evidence preservation, CVE research; Python, SQL, and PowerShell fundamentals

PROFESSIONAL EXPERIENCE

U.S. Navy | Cryptologic Technician Interpretive | April 2017–April 2023

- Specialized in Latin America as a Spanish linguist, applying language skills and intelligence analysis to counternarcotics missions.
- Analyzed signals intelligence, open-source information, and communications and behavioral patterns to identify anomalous activity and support investigations.
- Synthesized multi-source findings into 70+ intelligence reports for interagency and law-enforcement stakeholders; communicated analytical confidence, risks, and follow-up needs.

U.S. Navy | Program Manager | May 2019–April 2023 (concurrent duty)

- Reviewed intelligence products for accuracy, analytical rigor, sourcing, and adherence to reporting standards; coordinated stakeholder requirements and follow-up.
- Led 20+ analysts supporting daily monitoring of 600+ targets; coordinated information sharing, quality assurance, and operational escalations.

U.S. Navy | Training Coordinator | December 2018–April 2023 (concurrent duty)

- Built qualification programs for 30+ personnel; delivered 600+ hours of operational training to 80+ personnel and increased qualified entry-level analysts by 150%.

CYBERSECURITY PROJECTS AND TRAINING

Web Vulnerability Research | Hack The Box and controlled training labs | 2026

- Used Burp Suite, Nmap, and Nikto to investigate authentication, file-upload behavior, and exposed services; practiced SQL injection and researched CVEs in authorized exercises.

Linux Incident Investigation | Controlled training labs | 2026

- Investigated suspicious executables, privileged accounts, and systemd persistence using process, network, and journal logs; distinguished attempted lateral movement from confirmed access.
- Preserved artifacts with SHA-256 hashes and chain-of-custody records; verified evidence transfers and documented a reimage recommendation within the exercise.

EDUCATION AND CERTIFICATIONS

CompTIA Security+ and CompTIA PenTest+ | September 2026

CompTIA CySA+ | Training in progress; exam planned 2026

B.S., Computer Science | Colorado Technical University | June 2025

A.A., Spanish | Defense Language Institute | October 2022

MBA, Accountancy & Data Analytics | Colorado Technical University | Expected August 2027
